

JSON VALIDATION REPORT

Dataset Name: Product Catalog Sample Dataset

Validation Date: June 2026

Records Reviewed: 11

Validation Method:

- * Automated JSON validation using Python
 - * Field-level schema review
 - * Data type consistency checks
 - * Reference integrity validation
 - * Content quality review
-

EXECUTIVE SUMMARY

Total Issues Identified: 10

High Severity Issues: 5

Medium Severity Issues: 5

Low Severity Issues: 0

Issue Categories:

- * Schema Validation
 - * Data Type Consistency
 - * Reference Integrity
 - * Content Quality
-

DETAILED FINDINGS

Issue #1

Category:Schema Validation

Severity: High

Field:additional_tarriffs

Description:Field name contains a spelling error.

Expected: additional_tariffs

Actual:additional_tarriffs

Recommendation: Rename field to maintain schema consistency.

Issue #2

Recommendation:Correct spelling.

Issue #3

Category:Content Quality

Severity:Medium

Field:kind

Description:Typographical error detected in value.

Expected:misc tariff

Actual:misc tarriff

Recommendation: Correct spelling.

Issue #4

Category:Data Type Consistency

Severity:Medium

Record:AC3 Case Black

Field:for

Description:Field stored as string instead of array.

Expected:["ac3"]

Actual:"ac3"

Recommendation:Standardize field type across all records.

Issue #5

Category:Data Type Consistency

Severity:Medium

Record:AC3 Case Red

Field:for

Description:Field stored as string instead of array.

Expected:["ac3"]

Actual:"ac3"

Recommendation:Standardize field type across all records.

Issue #6

Category:Reference Integrity

Severity:High

Record:AC3 Series Charger

Reference:ac9

Description:Referenced product ID does not exist within the dataset.

Recommendation:Verify source data or remove invalid reference.

Issue #7

Category:Reference Integrity

Severity:High

Record:Phone Extended Warranty

Reference:ac9

Description:Referenced product ID does not exist within the dataset.

Recommendation:Verify source data or remove invalid reference.

Issue #8

Category:Reference Integrity

Severity:High

Record:Phone Extended Warranty

Reference:qp7

Description:Referenced product ID does not exist within the dataset.

Recommendation:Verify source data or remove invalid reference.

Issue #9

Category:Reference Integrity

Severity:High

Record:Phone Extended Warranty

Reference:qp8

Description:Referenced product ID does not exist within the dataset.

Recommendation:Verify source data or remove invalid reference.

Issue #10

Category:Reference Integrity

Severity:High

Record:Phone Extended Warranty

Reference:qp9

Description:Referenced product ID does not exist within the dataset.

Recommendation:Verify source data or remove invalid reference.
